

## FEATURES

- Industry leading durability and reliability
- Fully modulated speed range changes without stopping to shift
- Smooth shifting between high and low gears
- Compact layout for machine friendly package

## DESIGN BENEFITS

- Two gear ranges for slow working speeds and fast travel speeds
- Standard hydraulic motor mounting interface
- Suitable for 107 cc to 200 cc pump motors
- Designed for input speeds up to 5500 rpm
- Standard four-wheel drive
- External park brake for easy access and serviceability
- Output sensors designed to detect speed & rotational direction
- Max input torque up to 1100 Nm
- Input and output speed sensors available
- Transmission temperature sender available
